Introduction to Dynamic Glass -CEU Quiz

Solar Heat Gain Coefficient

Solar Reflective Factor

Glare Coefficient

Transparent Light Transmission

2. What is the percentage of visible light transmission needed in order to effectively mitigate a glare condition, and allow for a suitable indoor work environment?

0.5%

1%

1.25%

1.5%

3. What percentage of building ownership expenses are associated with people (staffing, benefits, etc.)? What percentage of building ownership expenses are associated with energy costs?

90% people, 1% energy

75% people, 5% energy

85% people, 1% energy

95% people, 5% energy

4. The dynamic glass distorts the view of outside to reduce the effect of the solar heat?

True or False?

True

False
