

# Sustainability & Energy Webinar Course Performing and Teaching DoD RCx Assessments-CEU Quiz

---

1. According recent studies, what average facility energy savings opportunities and \$/SF costs are associated with RCx efforts:

16% facility energy savings and \$0.30/SF costs

13% facility energy savings and \$1.16/SF costs

10% facility energy savings and \$0.75/SF costs

2. Which of the 10 key RCx skills was described as the most expansive and which one as the most critical?

scoping, trending

HVAC fundamentals, implementation

benchmarks, system diagrams

functional tests, data analysis

3. is RCx best defined as a quality assurance process identical to commissioning but focused on existing building systems that were either weren't commissioning or commissioned some time ago.

TRUE

FALSE

4. RCx resources from organizations including ASHRAE, PNNL, PECI, and CaCx can be described as

providing studies and guidelines that support RCx program and project development

responsible for developing a single RCx certification recognized by the industry helping to standardize

the level of in-house vs contracting support expected from each RCx effort

all of the above
